## REPORT OF THE EXECUTIVE COMMITTEE.

---

During times of financial distress, such as the summer and autumn of 1893, the demand upon charitable institutions is largely increased, while their incomes are liable to be correspondingly decreased; it is therefore with much pleasure that your Executive Committee can report that during 1893 they were able to keep the Children's Sea-Shore House open some days longer than usual. For actual details of the work done they beg to refer to the following report of the Physician-in-charge.

In our report for 1892 we called attention to the very generous offer of \$1000 made by Mr. George D. McCreary toward paying off the mortgage of \$6000. This offer was accepted, and within the time specified the amount was subscribed. This not only leaves the house free of debt, but practically increases its income.

We have also to report the building of a new Mothers' Cottage, larger and better in every respect than the older cottages. Another similar cottage will be ready before the next season opens. These two buildings cover the last available ground upon which Mothers' Cottages can be erected, and it is with regret that we have to ask that friends who in the future wish to present a similar amount of money will put it in the form of a "memorial bed," and in this way provide for an endowment to the institution. The regret expressed is that in this special line of work we have now arrived at the extent of our resources, but we believe that the formation of an endowment fund will materially add to the usefulness of the institution. It will allow of our providing for a greater number of patients and enable us to keep the house open for a longer season, and we look forward to the time when this endowment and increased donations will be sufficient to utilize our wards during the winter months.

The industrial depression of the past winter and the inability of thousands of families to supply proper food to their children will undoubtedly cause an increase in the number of sick children during the coming summer. We are, therefore, making arrangements to open the house promptly and to accommodate a greater number of patients than ever before.

This will, of course, necessitate a proportionate expenditure, and we trust that the subscriptions will at least be as generous as in former years.

The Committee wish to make special acknowledgment of the donations of Mrs. J. B. Lippincott and Miss Catherine A. Bond, for Mothers' Cottages; to Miss Waln, for a free bed; to Mr. George D. McCreary, for his subscription of \$1000 toward paying off the mortgage, and to Dr. Howard Kelly, of Baltimore, for his special donation of \$1000, given during the latter part of the season, in order that the house might be kept open during the hot weather of September.

In presenting these statistics of the great work accomplished by our institution during the summer, I cannot forbear to again call attention to what might be accomplished were our doors open throughout the year.

It would be impossible for anyone to visit our deserted building during the winter without a feeling of earnest regret that its bright wards, overlooking the sea, flooded with sunshine, and ever fresh with the ocean's health-giving air, should be empty and useless through two-thirds of the year. But a small outlay for heating purposes would be needed to convert it into a commodious hospital, with every appliance for the comfort and restoration of sick children.

Its location on the seacoast is the best possible one for the treatment of one-half the maladies which fill our city hospitals for children. It is safe to say that if, with the co-operation of the officers of those institutions, the chronic cases which no longer require surgical operations could be temporarily transferred to our wards, from fifty to seventy beds thus vacated in the city could be utilized for other cases requiring the skilled surgical treatment best obtained in great cities.

In this way the equivalent of a new hospital for children would be added to the charitable resources of our city, without outlay for ground, buildings, or furniture, beyond the small sum needed for our heating appliances.

Our large summer work now requires every dollar which we are able to collect, and it does not seem possible to increase our expenses. But may we not hope that this mention of the possibilities for the greater usefulness of our institution may lead someone, blessed with the ability, to give or bequeath an endowment fund sufficient to enable us to keep our doors open throughout the year?

Respectfully submitted,

WILLIAM H. BENNETT, M. D.,

ORIGIN AND OBJECT  
OF THE  
CHILDREN'S SEA-SHORE HOUSE,  
ATLANTIC CITY, N. J.

---

This institution, the first of its kind in the United States, was opened in a small cottage in 1872, and incorporated as the "Children's Sea-Shore House at Atlantic City, for Invalid Children," February, 1873. In July of the same year the institution was reopened in its present location, then occupying what is now its main building. Since then its capacity has been, from time to time, increased, until now it has accommodations for about one hundred and twenty-five children and thirty mothers.

The object of the corporation is to maintain, at the sea-shore, an institution in which children of the poorer classes, suffering from non-contagious diseases or debility incident to the hot weather and a crowded city, may have good nursing and medical care, without regard to creed, color, or nationality.

Children over three years of age are cared for by competent nurses in the large, airy wards of the main building, and, in order that those too young to be separated from their mothers may also be admitted, little cottages have been erected for the mothers almost upon the beach. One of them is assigned to each mother with a sick infant. She may also have one or more other children with her, and have for herself and them the exclusive use of the cottage, taking care of it and her children, but having her meals provided for her in the main building. A separate building located immediately on the beach is used for very serious cases needing closer attention than can be given in the little cottages. In it is also located the "Baby's Ward," for sick infants who cannot have their mothers' care.

Special provision has recently been made for the care of girls too old to be subjected to the restraint necessarily imposed upon younger children. Two wards have been set apart for their use, and a special matron has charge of them and devotes all her time to the girls under her care.

Since this institution was first opened, other most excellent organizations, with kindred objects, have been formed in Philadelphia. Each has its special sphere of usefulness, and that of the Children's Sea-Shore House seems to be to care for the following classes of children:—

**First.**—Those requiring not only the beneficial effects of the sea air, but also the skilled nursing and medical care of a well-organized hospital. Such are the many cases of hip-joint disease and spine disease now annually admitted.

**Second.**—Sick infants, who, wherever they go, must be accompanied by their mothers. The disease which produces such great mortality among them during summer is largely the result of the heat, and the cool temperature of the sea-shore proves one of its best remedies.

**Third.**—Little children, from three to five years old, needing purer air and better food, and yet too troublesome to be sent alone into the households of strangers. In some cases they are motherless; in others the mother is the bread-winner of a little family, and must remain at home to feed the rest. To such children this institution gives not only the best possible change, but provides the watchful care of trained and kind-hearted attendants.

**Fourth.**—There are many growing boys and girls who have not developed any well-defined disease, and who, indeed, often seem to the inexperienced eye to be perfectly well, but whose known scrofulous tendencies mark them as the future victims of some such serious maladies as those above mentioned of the hip and spine. For these the sea air is the best possible tonic; and a stay at this institution often decides in their favor the question whether they shall grow up cripples, or overcome the disease lurking in them and become strong men and women.

**Fifth.**—Young women, from fourteen to twenty, often greatly needing the benefits of a stay at the sea-shore, but too young to be allowed the entire freedom properly permitted in institutions for older women.

Circulars giving the mode of making application for admission can be obtained from the Physician-in-charge at the institution and from the Examining Physicians.

The House is at the sea end of Ohio Avenue, and is open to visitors Tuesday and Friday mornings, from 9.30 to 10.30 o'clock, and every afternoon from 3 to 5 o'clock.

*Contributions toward defraying the excess of expense over the small charge made for board are earnestly solicited, and may be sent to the Physician-in-charge or to any of the Managers in Philadelphia. The excess amounts to at least \$5000 annually.*

*A contribution of \$50 at one time entitles the donor to the use of a bed during the season.*

*A contribution of \$1000 will endow a perpetual free bed.*

GENERAL VIEW OF ALL THE BUILDINGS.

The above gives a general view of all the buildings of the Children's Sea-Shore House. In the foreground is the beach and breakwater ; on the left, the Play House for rainy weather, entertainments, etc. ; on the right, the Hospital Cottage ; in the rear of these, and forming two sides of the quadrangle, running back to the Main Building, are rows of Cottages, used for housing those children who are brought by their mothers. In a wing back of the Main Building are the Kitchens, etc., and still back of this the Laundries, Out-Houses, Coal Bins, Baggage Store-Rooms, and Servants' Quarters.

INFORMATION IN REGARD TO THE ADMISSION  
OF PATIENTS  
TO THE  
CHILDREN'S SEA-SHORE HOUSE,  
Atlantic City, N. J.

The institution will be opened early in June.

OBJECTS.

It is designed for the care of young invalids of both sexes, without regard to creed, color, or nationality.

Any boy under twelve or girl under twenty, suffering from a non-contagious disease, or from debility incident to hot weather and a crowded city, and likely to be benefited by a short residence at the sea-shore, can be admitted to the House.

ADMISSION.

Applications for admission will be received in Philadelphia by the Examining Physicians as on page 24.

Patients will be admitted on the certificate of their own physician, but this certificate must be made out on a blank furnished by the institution. Blanks can be obtained by mail from the Physician-in-charge. Enclose a stamp.

NO PATIENT SHOULD EVER START FOR THE CHILDREN'S HOUSE UNTIL A PERMIT HAS BEEN RECEIVED FROM THE PHYSICIAN-IN-CHARGE.

THE INSTITUTION

is divided into three departments, viz. :—

**First.**—The department for girls between fourteen and twenty. This is a new department, for which a special ward has been erected. The number admitted to it will be limited to twenty-four at a time. These will be under the care of a special matron, who will devote all her time to making

their stay pleasant, beneficial, and safe. *Every* application for admission to this branch must be accompanied by a testimonial of good character.

**Second.**—A department for children over three years of age and under fourteen. In the case of boys the limit is twelve years. These children are cared for by nurses in the main building of the institution, and their mothers are not admitted as inmates, as in the next department.

**Third.**—A department for sick infants under three and a half years of age, accompanied by their mothers. This is intended only for *infants* who are *sick*; and a sick mother with a well infant, or a mother whose *sick* child is over three and a half years, cannot be admitted. But a mother with a sick infant has the privilege of taking with her one or two other children, even though they may not be sick. The work in this department is carried on chiefly in the little “Cottages” connected with the institution, which are placed between the main building and the beach.

Each mother admitted has for herself and children the exclusive use of a comfortably furnished room. She takes care of it and her children, but has her own and their meals provided for her.

Large dining and sitting rooms for the mothers and an infant’s bath-room are provided in the main building.

In the admission of mothers preference will be given to those who furnish, at the time of their application, a testimonial of good character from some physician, clergyman, or other responsible person, but others will not be refused admission unless they are known to be unworthy.

**Special provision** has been made for the care of very sick infants who have been suddenly taken ill and require immediate removal from the hot city. Such cases are usually admitted within a few hours after application has been made to the Examining Physicians, communication being made by telegraph.

A very few sick infants will be admitted without their mothers.

#### THE CHARGES ARE AS FOLLOWS:—

For a girl over fourteen, in the first department, two dollars and a half a week.

For children in the second department, without their mothers, or an infant in the Baby’s Ward without its mother, two dollars a week.

For a mother and one child, in the third department, three dollars a week for the two, and one dollar a week for each additional infant or older child.

These charges include board, medicine, and medical attendance in all

cases, nursing in the first and second departments, and washing in the second. Mothers do their own washing. A complete laundry, with stationary tubs, is provided for the purpose.

*Charges are payable in advance on arrival at the institution.*

Children unable to pay these rates will often be admitted at a reduced rate, or without charge. But such cases must, *at the time application is made*, satisfy the Managers as to their inability to pay the regular charges.

### TRANSPORTATION.

Through the generosity of the Camden and Atlantic and of the West Jersey Railroad Companies patients can obtain tickets to and from Atlantic City at the reduced rate of fifty cents each way for adults, and twenty-five cents for children between four and twelve years of age. These rates are only granted to those having the regularly signed "requisitions" of the institution, which are sent to each patient with the order for admission.

### THE LENGTH OF TIME PATIENTS MAY REMAIN

in the institution is determined by the Physician-in-charge, in accordance with the necessities of the case. As it often does not exceed ten days or two weeks, vacancies constantly occur, and are at once filled from the list of applicants in order of their application.

### VISITORS.

Visitors are admitted daily between 3 and 5 o'clock, P.M., and on Tuesday and Friday mornings between 9.30 and 10.30 o'clock.

THE Managers of the CHILDREN'S SEA-SHORE HOUSE desire to give every poor, bedridden, or crippled child in Philadelphia a visit to the sea-shore during the summer of 1894.

No such child will be excluded because too poor to pay.

If you know of one, will you not put it in communication with the officers of the institution before you go away for your own summer vacation?

If you do not, will you not take a stroll through some of the little streets of your neighborhood and inquire for one? There are many of them in our great city, and a week's release from its narrow streets and stifling summer air would be a boon to most of them and the beginning of a new life to not a few. You need but tell of the institution, get a circular for the parents, and refer them to the nearest Examining Physician. He will attend to the rest.

During the month of June provision will be made without charge for hospital children and the sick and crippled children of other institutions.

If you are a manager of an institution for children, will you not communicate at once with the Manager of the Children's House, and make arrangements to give your little, sickly wards a visit to the sea-side?
